

Portable Saw Mill cuts logs up to 20 feet in length and 3 feet in diameter

McKim Mitchell,
owner and
operator of
Mitchell
Sawmilling.

Mitchell Sawmilling **COMPLETELY PORTABLE**

A timber frame home in
Dublin; the entire frame
was milled from trees
cut directly from the cli-
ent's property.

Allow Mitchell Sawmilling to bring the Sawmill to your logs instead of sending your logs to the Sawmill.

Mitchell Sawmilling is portable, allowing for the convenience and control of on-site milling. We will operate a portable band sawmill, milling logs to dimensions requested by its customers. Portable sawmilling allows you to generate building material from your own trees or if preferred, we will also market the milled material for customers who may not have need for the entire finished product.

Call today for a FREE consultation and initial log site visit.
